

Ecliptek Customers receive automatic emails with updated RoHS and REACH compliance docs

Oscillator and crystal manufacturer enhances their automated notification app to include regulatory compliance updates

September 3, 2015

Costa Mesa, CA - In an effort to help its customers stay on top of dynamic regulatory requirements, Ecliptek Corporation has upgraded its [My Parts List](#) app to send email notifications whenever the compliance status of saved part numbers is updated. Users of the app will now receive emails when any of their parts are updated with a new level of compliance, such as the recent change in REACH from 161 SVHC to 163 SVHC, or the new EU RoHS Directive 2015/863.

Ecliptek's [My Parts List](#) app gives users the ability to maintain a personalized list of favorite Ecliptek part numbers, where they can record their own part number and project notes for each one. The new email notifications will include their referenced part numbers, as well as direct links to the latest compliance docs.

In developing this new service, Ecliptek drew on specific customer feedback that highlighted global regulatory compliance as a growing priority. Meeting the demand for quick and easy access to updated compliance documents is the latest milestone in Ecliptek's [Self-Service Documentation](#) initiative, launched in April 2015.
