Ecliptek Press Release

Ecliptek's SmartSearch Gets Even Smarter With Debut of Stock Check Option

Popular crystal and oscillator parametric search app gets In-Stock filter

December 3, 2014

Costa Mesa, CA – Directly responding to customer feedback, Ecliptek Corporation has introduced a new In-Stock filtering feature to its well-received crystal and oscillator parametric SmartSearch app. The powerful web-based tool has been enhanced to help customers who need to find a part with immediate availability.

SmartSearch, introduced in March 2014, has proven to be the most efficient way for engineers and buyers to find frequency control solutions based on their most critical parameters. Users can define their key parametric requirements to quickly narrow Ecliptek's millions of unique part numbers down to meaningful results, and then drill down to part number level detail, which includes data sheets and compliance docs.

Ecliptek's advanced apps, including SmartSearch, provide easy access to part number specific and series level Data Sheets, product life cycle data, REACH, RoHS, China RoHS, and IPC-1752 documentation on well over three million crystal and oscillator part numbers.
